

INTERNATIONAL SCHOOL
EASTERN SEABOARD

2022 - 2023

16

Dec, 8th

All of us are really busy finishing our projects in the elementary school and taking finals exams in the secondary school. Teachers and students from around the school are busy practicing and working to have a successful Winter Festival next week.

Between rehearsals, fourth grade students went to Khao Kheow Zoo as part of one of their science units. It was a great experience for them! We have to say thank you to the elementary school parents who attended the workshop last Wednesday. It was a successful meeting about curriculum, assessments, standards and reporting. This information should help parents to better understand the report cards coming out next week.

We hope to see you next week for the Walkathon and the Winter Festival!

ISE Team

ISE Our PTA

~~~~~

**OUR PTA and Parents**  
organized a party at Eastpana  
Hotel for MRISA athletes last  
Friday evening. The coaches  
Mr. Kennedy and Ms Kelly  
Cho gave an award to  
recognize their participation  
in this event in Vietnam. They  
celebrate with friends and  
parents and had a lot of fun

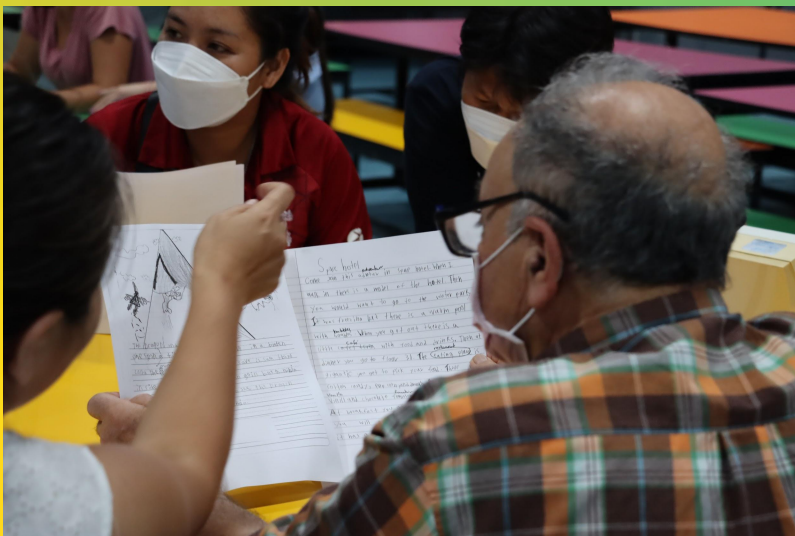

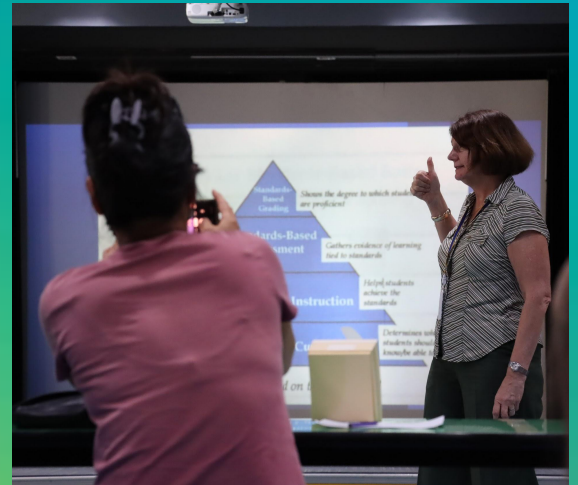

# Elementary School Workshop

On Wednesday, elementary school parents attended the school to participate in a workshop : Standards-based curriculum, assessments and reporting at ISE. Was a pleasure to see them involved and participating in their children's education.

# Elementary School G4

To extend our learning about living things, the Grade 4 class went on a field trip to Khao Kheow Zoo this week to learn more about some of the incredible animals on display. The focus of the trip was to identify some of the adaptations of the animals, and speculate on either why these adaptations were necessary, or how these adaptations would help the animals survive. Students had to further reflect on the effect humans have on the environment, and the pros and cons of keeping wildlife in zoos. It was an enlightening and enjoyable experience overall for everyone!

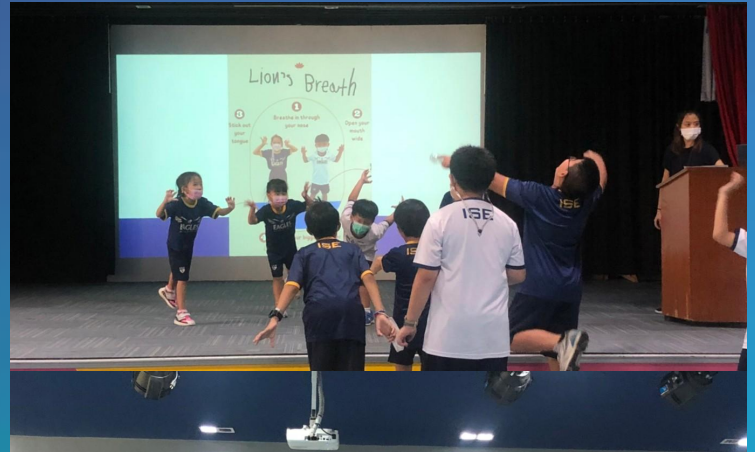

# Elementary School KG Assembly

G5 Music class dance lesson seeks to nurture students as movers, thinkers, creators and performers as they investigate and experiment with movement, learn the fundamentals of dance technique, explore various dance styles, build and choreograph dances and present and perform their learning for others. Students learn dance to build creative thinking, problem solving and collaboration skills. Learning through movement allows students to build kinesthetic connections as they experience the world around them, while encouraging a creative outlet for expression.

Last Friday they showed what they learned in our elementary school assembly

# Secondary School

High School final exams began on Thursday the 8th until next Tuesday.
