

2021 - 2022 # 18

This week all the students have finally returned to school. They are really excited to be on campus again and spend time with their classmates.

G12 had their Thai Studies Trip in Hua Hin, where they learned more about Thai culture and Thailand's beautiful places. Our PTA had their first meeting of the second semester.

Elementary School

Art

KG

Kindergarteners learned about "Form in Architecture", they have made the house form using paper bag, then cut out basic shapes to make doors and windows and decorated the house's areas. It took a lot of concentration in working and it's good to practice their fine motor skills. Making 3-D art is a favorite with this young artist.

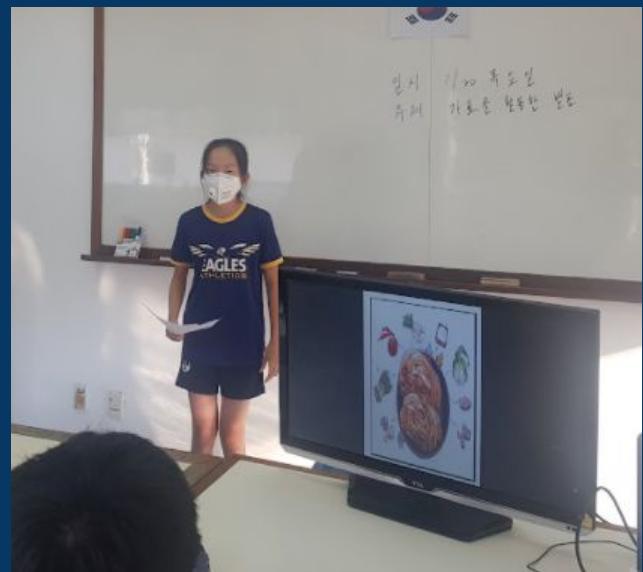

Elementary School

Korean

G4 & G5

"In Korean class, we have learned the proper usage of the language and the manner by participating in class activities. Also we've developed the presentation skills with various materials. "

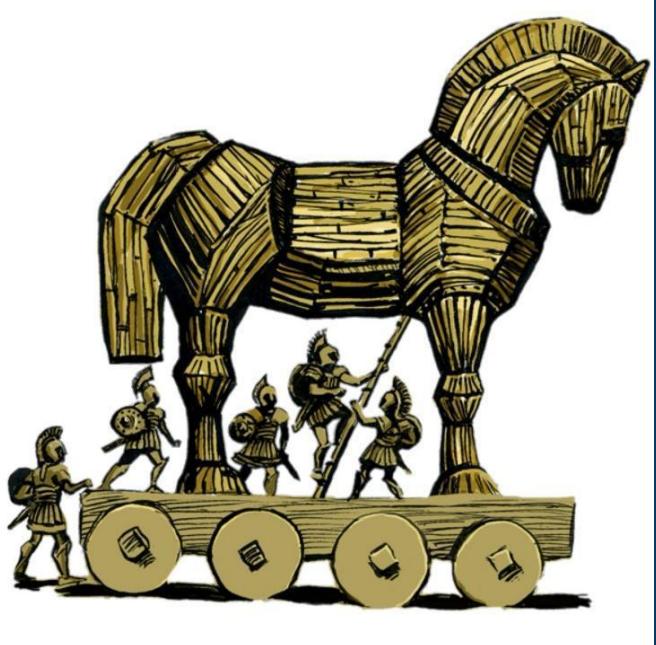

G6, G7 & G8

Having pupils in school at the end of last semester, I am sure we all hoped for continuous in-school learning. However, at the moment, Middle School are still being taught online or with a hybrid system.

Grade 6 are currently completing their work on Migration, as a means of learning about some amazing natural events, and broadening their knowledge of geography. The Arctic Tern hatches during the summer in the Arctic, flies 12,000 miles south for the Antarctic summer, then flies back again. Their migration covers 30,000 miles each year and is the longest migration of any animal on Earth. Some students complain if MR James asks them to run a mile!

Grade 7 are completing their work on Ancient Greece with a study of the Trojan War. What evidence is there that Homer's story in the Iliad has any basis in fact? We use many Greek expressions in everyday life. A Trojan horse on a computer is a download disguised as a legitimate program. An Achilles heel is 'a weakness', following the story of Achilles having his body dipped into the River Styx with his mother holding his heel, thus making that the only part of his body that was vulnerable. The Achilles tendon is the tendon connecting the calf muscle to the heel, and is named after Achilles, the great Greek hero

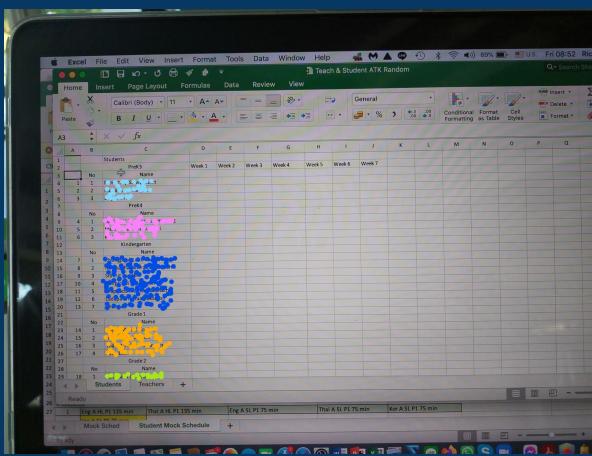

Grade 8 are learning about the development of knowledge concerning the Earth and the solar system. Ancient people believed in a flat Earth, and that the Earth was the center of the solar system. In 1632 Galileo was imprisoned for contradicting this view, and suggesting that the sun was the center of the solar system. However, Eratosthenes in 240B.C.E. believed that the Earth was a sphere, and even measured its circumference with great accuracy. Today we use satellites. He used the sun and a stick. A long time ago there were some very clever people!

G11

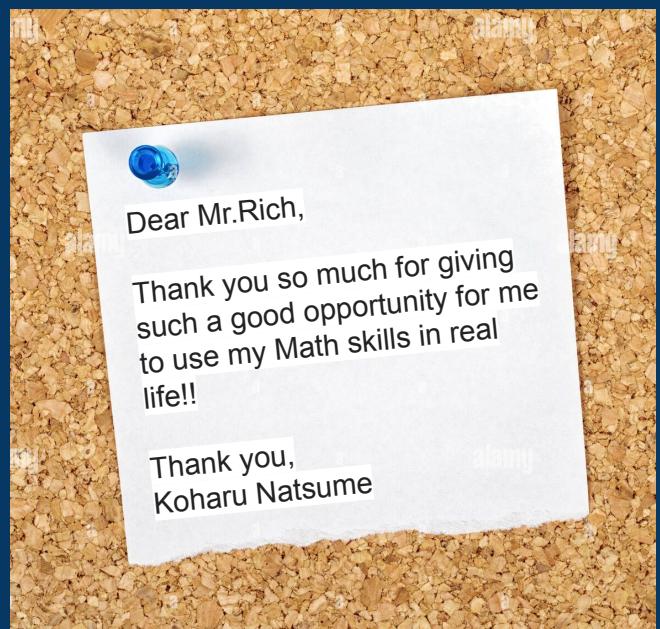

Covid days...

How we can apply Math?

Koharu applied recently learned math skills to develop an **7-week ATK test plan for Nurse Smile** that randomly sampled a given selection of the students and teaching staff.

Great to have your support Koharu!

G12

Thai Studies Trip

Twelve graders had a four days field trip in Hua Hin. They had the opportunity to go to the **Night Market Hua Hin, Treetop Adventure Park, Vananava Aquatic Park** and Scuba Diving in Koh Thalu.

Great experience for everybody
